

Advanced Dairy Management Course

Funded in Cumbria by the European Social Fund, The Edge programme

Course Overview

The principal objective is to deliver advanced management training for dairy herd managers, present or future, with the essential skills and knowledge to allow them to thrive within a modern dairy farming industry.

The course covers all critical areas of modern day dairy farming and will focus on providing management tools and knowledge which can be utilised on a day to day basis to achieve best practise.

The course comprises of six, two-day courses. The course content will be delivered by industry professionals providing a current and expert view. The course will be based at the Newton Rigg College dairy farm and will be a mixture of classroom based theory and on-farm practical demonstrations and exercises.

Each module provides focused and comprehensive best practice training within dairy farming with the aim of providing a complete dairy training programme.

The course will be assessed on a modular basis. This will be based upon short answer written assessments and practical demonstrations of knowledge.

The course is DairyPro registered with CPD points available.

Previous feedback

Everything was relevant. Nice group of people, good discussions & very friendly. 'm continuously relating back to things I've learnt on the course. A good couple of days away from the farm meeting new people & learning new things.

Prerequisites

Learners need to be working on a dairy farm, have a minimum of two years relevant experience with good literacy and numeracy skills and wish to excel in dairy herd management.

Tutor Biography

With an agricultural background, James is an experienced consultant based in Cumbria. Having worked as a Dairy Consultant for over 9 years, he has an excellent track record at delivering change on dairy farms, both in terms of technical and financial improvements. He has an excellent grasp on dairy farming best practice and efficiency gains.
